

Greetings,

We are excited to inform you that Scantron offers resources to help Alabama students prepare for the Health Science and FACS credentialing exams. Information about these Scantron resources are listed below. Please utilize these options as you see fit.

1. Pre-Certification Practice Tests administered via Achievement Series

- Multiple opportunities for students to practice using pre-built tests or teacher-built tests.
 - Options include standards-based quizzes, classroom tests, and a comprehensive 100-questions test
 - Covers CNA/PCT, & Food Safety Content
 - Tests may be administered in person or from home
 - Immediate feedback on student performance
 - No pretest set-up is required*
- Website: www.achievementseries.com

2. Pre-Certification Exam administered via Scantron's Secure Portal

- Comprehensive pretest developed by national and state subject matter experts
- Proctored environment that provides test and item security. (*NOTE: During COVID, we have added the capability for students to test at home with an approved proctor/adult.*)
- Covers CNA/PCT, & Food Safety Content
- Reports are immediately available to help teachers determine student readiness
- No pretest setup required*

**Standalone CTE Centers will need to work with Scantron to import classes into the testing site prior to testing.*

Please adhere to the requests below when you are ready to administer the Pre-Certification test:

At least three (3) days prior to pre-certification testing, contact alabama@scantron.com to receive your test access codes. This information will be provided to you via a secure ShareFile site. The test access codes and State Student ID (SSID) are needed for students to access the test.
